

Looking for an opportunity to advance women's health?

You may be eligible to participate if you are:

- 18 - 40 years old
- non-pregnant
- willing to have blood and/or genital samples collected

This study involves the collection of samples that will be used to develop laboratory procedures for future clinical studies.

This study does not involve the use of any medication.

Women who participate will:

- undergo a urine pregnancy test
- have rapid HIV testing
- be compensated for the samples that are collected
