Looking for an opportunity to advance women’s health?

You may be eligible to participate if you are:

- 18 - 40 years old
- non-pregnant
- willing to have blood and/or genital samples collected

This study involves the collection of samples that will be used to develop laboratory procedures for future clinical studies.

*This study does not involve the use of any medication.*

Women who participate will:

- undergo a urine pregnancy test
- have rapid HIV testing
- be compensated for the samples that are collected
